Numbers can be magical, special, significant.

From this thought, our new typeface 'Timepiece Display' was created. It started with numerals influenced by the style of a classic yet functional wristwatch from last century, circa 1915, the Rolex 'Trench Watch', designed for those who needed precision and reliability in extreme circumstances. Timepiece display thus first began as a set of numerals, styled classically but with a futuristic edge, in order to make them timeless. To make the set of numbers complete, they were soon joined by a family of letters so that they could enjoy being part of a complete font.

We hope Timepiece Display is a pleasure to watch.
